ABSTRACTED-PUB-NO: CN 1231229A

BASIC-ABSTRACT:

The production method of rice straw fiberboard using rice straw as main raw

material includes the following steps: procedures of pretreatment,

alkalization, neutralization to make the rice straw intorice straw fibre wool,

mixing it with resin adhesive and magnesium oxide according to a proper

proportion, stirring, spreading for block-forming, high-temp hydraulic pressing

and cutting to obtain the invented finished product with low

cost, good fire-resisting and damp-proofing properties, high acid resistance and alkali resistance, high strength and extensive application. It not only can be used as decorative board material for building, but also producing furniture.

ABSTRACTED-PUB-NO: CN 1264778A

BASIC-ABSTRACT:

NOVELTY - A new-type wall brick able to save energy resource is made up of rice

straw, wheat straw, corn stalk, cane dregs, waste paper and classified garbage

through mechanically preparing grout, mixing with adhesive, filler and chemical

assistant, moulding and solidification, and features light weight, thermal and

audio insulation, and high moisture, fire and earthquake resistance. Its

advantages are simple technology, easy construction, and saving energ resource.

ABSTRACTED-PUB-NO: CN 1212957A

BASIC-ABSTRACT:

A fire retarding decorative compound plate is made up of saw dust and rice

straw through treating with bittern and addition of light burnt magnesium oxide

powder having good flame-retarding nature and glass fibres.

USE - Used to make refractory door or isolating wall.
